

Not sure if we need a login system, It is not mentioned in the assignment but we could since we need to differentiate users and admin. We might need to use JS for comparison of the name and pw.

For users, jump to the course enrollment page. For admin, we show the wanted result and a few fields for creating a course (save it to DB).

问题1:我们需要有注册新用户的功能么？作业要求里没有。

问题2:每个学期5门课。也就是不同的学期，course ID 和 course code 是一回事儿么？

问题3: start of the semester, end of the semester, 和course 的start date 一致。

Tables:

Student

<u>sID</u>	fName	lName	address	email	phone	dOB	password
primary key	char(30)	char(30)	varchar(255)	varchar(50)	int (10)	Date	char (30)

Administrator

<u>employmentID</u>	fName	lName	address	email	phone	dOB	password
primary key	char(30)	char(30)	varchar(255)	varchar(30)	int (10)	Date	char (30)

Course

<u>clD</u>	courseCode	title	semester	days	time	instructor	room	startDate	endDate
primary key	char(30)	char (30)	char(30)	int(250)	Time	char(30)	char(10)	Date	Date

Enrolled

<u>sID</u>	<u>clD</u>
